Lutron's VIVE is a game changer!

Wireless Lighting Control that's simple, scalable AND economical for all sizes of buildings is now available for your Commercial Projects! Check it out!

Cold Plasma Clean has patented technology that **kills germs**. The eXtremeAir cPc uses a generator that converts the air into cold plasma. Cold plasma is ionized air that contains positively and negatively charged ions that attract and break down germ molecules without the use of chemicals. **AMAZING!**

Load Shed

Schedules

New Miniature Profile LED Fixtures

This new family of low profile LED fixtures offer three lens styles:

- 1) flat semi-round lens
- 2) round lens and

3) square lens.

All three options provide a smooth light uniformity, with no pixelization.

These small profile fixtures with remote LED drivers are ideal for a variety of surface and pendant mount applications where size matters. Standard performance features include 0-10V dimming and up to 1100 lumens/ft.

Introducing the Mirada Family of Architectural LED Lighting

The Mirada's sleek design makes it perfectly-suited for architectural applications, while its

cost-effective die-cast aluminum housing makes its acquisition cost very competitive.

The Mirada uses high performance silicone optics, casts 35,000+ lumens and is available with integral and wireless controls. US & Int'l. patents pending.
